

## Flexible warming pad for storing and maintaining lithium-ion batteries

### PRODUCT FEATURES

#### FEATURES/FUNCTIONALITY

- Maintains temperature of 50-70 degrees Fahrenheit when used in a concealed small area
- Two options: a 120-volt wall plug with 30-inch cord and a 120-volt wall plug with 30-inch cord and 24-inch car adapter for portable heating capability
- Fabric exterior of 600 denier polyester fabric surrounding heating insert extends integrity and performance
- Functional size and flexibility to use within storage or transport containers

#### BENEFITS:

- Maintains the longevity and functionality of electric cordless and power tool lithium-ion batteries
- Reduce carrying multiple backups with on-the-go convenience
- Durable, flexible and withstands damage prone environments
- Improves functionality of other construction materials from freezing like caulk, paint etc.

Integrated heating technology that can be used within small areas to protect batteries and maximize performance in cold temperatures

12V adapter with 24-inch cord

#### SPECIFICATIONS

- Product Dimensions – 13" x 8"
- Weight – 0.87 lbs.
- 120V Power Supply
- 12V Vehicle Power Supply

120V wall plug with 30-inch cord
